

FEAR TROUBLE

Clash Between Strikers and Michigan Troops Imminent.

Operators Refuse to Hold Conference With Miners.

Calumet, Michigan, July 25.—Whether the coming of state troops to the copper country means an end to violence of fresh outbreaks, was the chief subject of discussion in Calumet today. Many look for clashes about various shafts, despite the policy of the Western Federation against the use of force by the men. Troops will be distributed among the mines and kept within easy communication. Brigade headquarters will be in Calumet. Troops are pitching tents about the army and adjacent fields. Menominee, Soo, Alpena and Sheboygan companies are expected here before noon and lower peninsula companies will arrive during the afternoon. Houghton company arrived last night. Captain Mead, company A, engineers, who held his company under orders at the armory all night, is at a moment's notice to respond. Large numbers of strikers gathered about Number 2 Calumet and Heckla shaft this morning, but this is not a demonstration other than letting out an occasional yell. They threatened, however, to go to the Superior boiler house of the Calumet and Heckla and draw the fires, but so far have made no attempt to do this.

General closing of saloons is expected if more violence occurs.

Gov. Ferris is being kept advised of developments and is not expected here until the situation takes a crucial turn. Troops were welcomed by the people generally as the violence of yesterday presaged more serious trouble. Deputies, unarmed, were unable to cope with the strikers and the authorities were reluctant to permit the use of arms. Last night's mass meetings and parades developed no disturbance. The Western Federation of Miners is holding out for a conference with the mine managers, but this is said will not be granted. In the strike area of seventy-five miles 25,000 or more men are idle. These include surface and stamp mill hands.

Smelters are still operating. The strikers for the most part are young, unmarried Austrians, Finns, Hungarians, and Bulgarians.

Two thousand strikers of the Keweenaw county mines, adjacent to the Calumet district, marched to Calumet from the Ahmeek, Mohawk, Allouez, Wolverine and Centennial mines. The marching miners reached here at 10 o'clock and passed quietly through the streets. A large American flag was carried at the head of the line and there were many small flags. The men were laughing and joking. Militiamen are at the South Shore depot awaiting the arrival of other Upper peninsula troops. Strikers this morning drove deputies away from the Wolverine and Ahmeek mines. At the Allouez mines the fires were drawn by strikers and the pump practically no disordered pit to noon. Guy E. Miller, Colorado member of the executive board of the Western Federation of Miners issued a statement in which he compares conditions in the Calumet district with those in other copper producing sections.

"The cause of the strike here was a deep seated unrest whose extent the company management failed to realize," he said.

"In asking recognition of the union, an eight hour day, abolition of the one-man drill, and improved conditions generally we have simply tried to put the miners and surface workers of the Lake Superior mines on a par with men doing similar work in other parts of America."

"In Butte for instance, the minimum wage with copper at \$2.50 cents is \$2.75 a day for underground men and in no case does it go below \$3.50. In Arizona it averages \$3.75, but in the Calumet district the maximum is from \$2 to \$2.50 and the men here have been working from ten to thirteen hours a day whereas in the other mining sections 8 hours constitutes a day's work."

All Troops Called Out.

Lansing, July 25.—It was announced in the adjutant general's office today that practically every company in the Michigan National Guard was either on its way to the copper country or would entrain as soon as cars are available.

It was reported more than 2,000 militiamen would be in the strike zone before tomorrow night. Brigadier General P. L. Abbey head of the state militia, will take charge.

TRANSPARENT BODIES

New Fluid Makes Human Being Easily Seen Through.

Philadelphia, July 25.—A new method of giving medical students instruction which it is said will largely obviate the necessity of dissection is to be tried at a local medical college. The process originated through the recent discovery by a German student of a fluid by the use of which the human body can be rendered transparent. The fluid is composed of several oils, and it turns the flesh into a sort of transparent jelly, enabling the student to study the veins, muscles and bones even better, it is asserted than if they resorted to the dissecting knife.

HYDROPHOBIA DEATHS

Two Die From Disease Made Rare by Pasteur Treatment.

New York, July 25.—Two deaths from hydrophobia, fatal cases of which have been rare since the discovery of the Pasteur treatment, are reported from New York. The first victim, John J. McInerney, aged 14, died in the Jersey City hospital last night from a wound received over two weeks ago when a dog bit him. He thought he had recovered from the trouble which the wound first caused him, but on Saturday last he was seized with convulsions and taken to hospital. The other victim is Henry Holland, Jr., a chauffeur, whose death at a suburban sanitarium Tuesday night has finally been declared by the authorities to be a case of hydrophobia.

Dead Letter Sale Nets \$1,105.75.

Washington, July 25.—When officials of the dead letter branch of the postoffice department today finished counting the dimes, nickels and pennies derived from the annual "dead letter" sale, they discovered that the United

States government was \$1,105.75 richer as the result of carelessness on the part of those who in the past year, entrusted badly directed packages to the mails. No parcels post matter was in this sale, as that service has not been established long enough to permit of the sale of the uncalled for or misdirected packages.

NAVY IN PACIFIC

Battleships Will Be There When Canal Opens.

Navy's Secretary Looking for Pacific Dry-Dock Site.

San Francisco, July 25.—"After the Panama canal is opened, the battle-ship fleet of the American navy will be as much in the Pacific ocean as in the Atlantic," said Secretary Daniels today. "The fleet probably will pass through the canal next April," continued the secretary, "and of course its presence in these waters will mean the establishment of a naval base, with dry docks and all the other equipment necessary for the maintenance of a fleet."

"I am here to examine the sites suggested for a dry dock on San Francisco bay."

RACE WITH WATER.

Damaged Ship Noses Into Dock and Immediately Settles Down.

Vineyard Haven, Mass., July 25.—The freighter Millinocket from Stockton, Me., for New York arrived here at sunrise today in a sinking condition. It had collided at midnight during a fog with the Persian, a passenger steamer bound from Philadelphia for Boston. A wireless message received from the Persian stated her bow had been damaged.

The Millinocket's flight into Vineyard Haven was an exciting race against the water which was rapidly climbing upward in her hold.

As she turned East Chop, at the entrance to the harbor, she was well down by the stern and as she anchored, her rudder touched bottom. Her stern also settled but the bulkheads in the engine room and forward hold kept her afloat. The Millinocket rounded Cape Cod early last evening and soon afterward ran into a thick bank of fog. At midnight, just before reaching Pollock Rip lightship, the Persian suddenly loomed out of the fog on the starboard side close aboard.

Neither vessel had time to stop or to veer. The Millinocket was struck on the starboard side aft of amidships and her plating was ripped open to the waterline.

Boston, July 25.—Her stern twisted and her hull partially filled with water the steamer Persian reached here just before noon today. In a dense fog off Pollock Rip early this morning the vessel was in collision with Millinocket. No one was injured.

FLYING INSPECTION.

Aeroplane Used by Government Man to See Work Done.

Duluth, July 25.—What is said to be the first inspection of government works about the Great Lakes from a flying machine was made late yesterday by Chief Assistant Engineer John H. Darling, of this district. When the engineer prepared to make his inspection of the harbor extension work it was found that the government launch was already in service. Tony Jannus offered to take Mr. Darling with him in his hydroplane on flight about the harbor and the engineer accepted the invitation. They started from an aerial bridge and crossed all the works on both the Duluth and Superior sides.

"It's an ideal way to travel for inspection," said the engineer, "and at his return." "It saves time and gives one a much better opportunity to look at the work being done."

CANADA WANTS FOXES

Uncle Sam Has Valuable Animals and Place to Keep Them.

Washington, July 25.—A number of Canadians have written to the department of commerce seeking to buy some of the blue and silver foxes from the government's preserves in Alaska, but no citizen of the United States has made similar requests, although the department is anxious to get some Americans to go in for fox breeding.

Assistant Secretary Sweet declared today that good profits await those who take up the industry. The government, he said, has a number of small islands off the Alaskan coast which it will lease to anyone who desires them for fox farming, and at the same time the government will furnish breeding animals at low prices. There are several fox raising establishments in Canada, said Mr. Sweet, which are reported to be making big profits and as the skins bring fancy prices in London, center of the fur trade, he thought citizens of the United States should be reaping part of the returns.

THEY UNDERSTOOD LOVE

Couple of Different Tongues Are Wed Through Interpreter.

Gary, July 25.—The universal language of love was demonstrated yesterday when Manuel Courtills, a Greek, and Julie Gavray, a Hungarian girl, were married at Crown Point.

Neither could understand the language of the other.

The interpreter made the marriage vows plain as Judge Harvey Nicholson read the ceremony.

BURN CUBS' UNIFORMS

Destroyed in Laundry Fire—Will Have New Ones.

Chicago, July 25.—When the Chicago National team returned to the West Side park tomorrow they will appear spick and span in their new uniforms. The old set was consumed in a fire which destroyed a laundry yesterday. It is a question whether the club, the players or the laundry will settle for the new raiment.

15c Curtain Scrim 7c
Odd patterns taken from stock of the 15c quality and priced at 7c yard.

Will Not Interfere.
Commerce Commission Lets Parcel Post Question Alone.

Washington, July 25.—Public hearings will not be held by the interstate commerce commission upon the expediency of the changes proposed by the postoffice department in the rates, zones and weights of parcel post matter. In a statement issued today the commission says it has no jurisdiction over the compensation paid by the postal service for hauling the mails. In part the statement follows:

"The commission does not consider that the provision of the parcels post act to the effect that certain changes may be made by the postmaster general, with the consent of the commission, contemplates that the commission shall necessarily hold hearings on such proposals, but when, after such investigation as it deems fit the commission is satisfied that the proposed changes are 'in order to promote the service to the public or to insure the receipt of revenue from such service adequate to pay the cost thereof,' it is proper for the commission to give its consent to the change."

AGAINST COTTONWOOD

Atchison People Blame Trees for Their Sore Eyes.

Atchison, Kan., July 25.—Cottonwood trees are to be put on the black-list in Atchison. The so-called cotton from the trees has caused so much eye distress here this summer that an ordinance will be introduced and in all probability passed at the next meeting of the city council providing for the cutting down of all cottonwood trees.

Persons advocating the passage of the ordinance say that they find several Kansas towns have anti-cottonwood tree ordinances.

Built Fire Under Baby's Cradle. Greensburg, Pa., July 25.—Mabel, the 4 months old child of Charles J. Powers, was burned to death today when her brother Charles, aged 4 years, built a fire under a baby cradle in which the child was sleeping.

BE WEATHER CHANGES

Forecast Not for Climate But in Weather Bureau Heads.

Washington, July 25.—Reorganization of the weather bureau is soon to be made as a result of a report made today to Secretary Houston by a special committee appointed some time ago to investigate the workings of the bureau. The committee consisted of E. H. Dowie, C. F. Marvin and E. B. Calvert. The changes they recommended will not be put into effect all at one time. Secretary Houston said today he was not ready to announce what they would be but it is known that economies will result in certain lines by doing away with duplications and that the secretary believes greater efficiency will result. No successor to Willis L. Moore, dismissed as head of the bureau some time ago, has yet been announced though a man has been selected.

Duchess of Marlborough in Politics. London, July 25.—The duchess of Marlborough, who was formerly Constance Vanderbilt, is understood to have accepted the presidency of the Women's Municipal party. This organization was formed recently with the object of putting forward women candidates for office in the various municipalities which constitute the metropolitan district.

LOWER PARCELS RATES

Postmaster General Predicts Greater Reductions.

Washington, July 25.—Despite senatorial criticism of the proposed reduction in parcel post rates and the increase in the size of the packages, Mr. Burleson today announced he would issue the final orders at once, putting the changes in effect August 15. The announcement came after the wisdom of making the changes had been subjected to a searching review before the senate postoffice committee in the presence of the postmaster general. Chairman Clark of the interstate commerce commission, explaining why the commission had sanctioned the proposed changes, said he believed the postmaster general had power under the law to make the changes.

"I am convinced that the postoffice department ought to, and will extend the parcel post until it will carry all packages up to 100 pounds," he added.

Washington, July 25.—In answer to criticism of his proposed reduction of rates and the increase of size of packages, Postmaster General Burleson today appeared before the senate postoffice committee with Chair-

MISSOURI EDITOR DIES ON TRAIN

Clinton, July 25.—H. H. Mitchell, editor of the Booneville Republican, died on the Katy flyer this morning while on his way from St. Louis to Booneville. A daughter, Mrs. A. A. Crome, lives here. Mr. Mitchell formerly was postmaster of Clinton for eight years and editor of the Henry County Republican several years. He was a leader of the Republican party in the state.
